

NCR RealPOS™ Cash Drawer Family

Reliable,
Secure
Peripherals

- Superior Usability and Reliability
- Advanced Testing
- Secure design

To help maximize store productivity and ensure the highest levels of security, your point-of-service (POS) workstation must incorporate reliable, consistent, and long-lasting POS peripherals. Designed for a variety of retail environments and regional specifications, NCR RealPOS cash drawers provide a secure component of your NCR RealPOS solution.

A Cash Drawer for Every Need

Every retail environment throughout the world is different and NCR understands that. NCR has evaluated each region and industry requirement to release a family of cash drawers that not only support these requirements but complete the NCR RealPOS solutions as well. They are fully certified and supported by all NCR RealPOS platforms in size, color and functionality. Multiple tills, configurations and colors are available depending on the region of the world and the check stand environment. The NCR RealPOS Cash Drawer Family has been designed with both full functionality and flexibility in mind.

NCR RealPOS™

Cash Drawer Family

Consistency You Can Count On

To ensure the highest quality and reliability, NCR RealPOS cash drawers undergo comprehensive environmental and compatibility testing and are manufactured under strict NCR standards. Unlike 'off-the-shelf' products, NCR places great emphasis on ensuring our cash drawer components remain consistent over time to support the longer lifecycles that retailers expect. All of these features come together to protect your investment.

Developed with High Standards

All NCR cash drawers are designed to give retailers piece of mind, incorporating components such as an emergency release latch and a micro-switch for drawer open detection. Since cash drawers require high voltage to 'fire' the drawer open, NCR's solenoid design, which contains a diode, helps protect both the cash drawer and the POS terminal or POS printer circuitry from this high voltage spike.

NCR Service and Support

Our responsive global services team can help you protect and optimize your investment even further, offering a complete portfolio of consulting, development, integration, maintenance and support services. Offering complete solutions to meet your business challenges, NCR retail experts will work closely with you in tailoring your NCR solution to support your business objectives and deliver the value that you – and your customers – expect.
